Volunteer Quick Facts

Move-In Fall 2026

SDSU
Office of Housing Administration & Residential Education Office

Thank You to Our Amazing Move-In Volunteers!

We appreciate your time and interest in making every student's move-in experience special. This year, over 9,200 students will be moving into on-campus housing. Thank you for being an essential part of the move-in experience! Use this sheet as a reference tool when communicating with residents and to learn what's new!

Residential Housing Endowment

The Office of Housing Administration and Residential Education Office at San Diego State University are dedicated to ensuring the academic and personal success of students by creating safe and welcoming residential environments where students can learn, grow and thrive. Research shows that living on campus enhances student success, and we believe that all students should have the opportunity to experience this, regardless of socioeconomic status.

Our Residential Housing Endowment provides financial support for first-generation, Educational Opportunity Program (EOP) students and students from low-income households. It helps them thrive academically and socially in a supportive community while addressing housing and food insecurities. Donor support ensures all students have the opportunity to succeed.
